COSWICK HARDWOOD FLOORING

Coswick Ltd. is a European wood flooring company founded in 1995. The production is located in the Republic of Belarus, in the city of Zaslavl.

The main products of the company are three-layer single-strip floor boards, Chevron and Herringbone, mosaic flooring and parquetry, as well as sports floors for professional arenas and multi-purpose grounds.

INNOVATION. We apply all our many years of experience and knowledge, invest in new technologies and our own innovative know-hows to create reliable and durable floors that can be successfully used in a wide variety of facilities and in any climatic conditions.

QUALITY GUARANTEE. We adhere to high standards of product quality and safety, as well as confirm this in international certification systems. Quality is under control at all stages, from raw material selection to the finished floor.

HEALTHY ENVIRONMENT. For the production of parquet floors, we use certified environmentally friendly adhesives and protective coatings that do not emit substances harmful to human health. We regularly test products for compliance with European environmental safety requirements.

ECOLOGY. We introduce technologies that guarantee the safety of production for the environment. In practice, we apply the principles of rational use of natural resources. We use FSC-certified and controlled wood from forests where environmentally and socially responsible forestry is practiced.

COMPREHENSIVE SERVICE. We are always in touch with our clients. Any project is accompanied at all stages, provide expert and technical support before, during and after the installation of the floors.

INTERNATIONAL RECOGNITION. Over 90% of our products are exported globally. Coswick dealer network spans over 50 countries on all continents.

SUPERB STABILITY

- BALANCED AND SYMMETRICAL CONSTRUCTION
- INCREASED STABILITY
- EXTRA-DURABLE

BALANCED CONSTRUCTION

Balanced 3-layer construction of the floorboard remains stable even in the wider range of environmental humidity.

- All three layers are made of hardwood, top lamella is made of oak, ash and American walnut, middle core is made of birch, the base lamella is made of oak or birch.
- Using birch as a core instead of softer pine species increases the stability of the board as birch is far more resistant to deforming.
- Upper and base lamellas have the same thickness of 3mm, which allows them to affect the core symmetrically in case of changes in the environment. This increases the balance of the construction and practically eliminates the possibility of twisting.

CORK COMPENSATORS

Usage of cork compensators in the core layer provides additional stability and balance in case of variations in the environmental humidity.

EXTRA-DURABLE POLYURETHANE GLUE

Coswick uses a special polyurethane hot-melt adhesive for bonding of its 3-layer engineered flooring planks. It is durable, moisture-resistant and highly elastic.

When compared to other types of adhesives it has several advantages:

- There is no delaminating of the board at the seams even in case of flooding.
- No "ageing" effect: bonding qualities are retained over the entire life of the floorboards.
- Environmentally friendly formulation: no formaldehydes or other harmful chemical compounds.

- OVER 72 UNIQUE COLORS
IN 3 PROTECTIVE FINISHES

ECO FRIENDLY

- ENVIRONMENTAL
SAFETY DECLARATION

- NATURAL TIMBER,
ENVIRONMENTALLY SAFE MATERIALS

- RESPONSIBLE FOREST USE

- WASTELESS PRODUCTION

ENVIRONMENTAL SAFETY DECLARATION

Coswick pays close attention to creating environmentally safe products and rational use of natural resources, reaffirming this dedication with regular examinations and internationally recognized certification.

NATURAL TIMBER, ENVIRONMENTALLY SAFE MATERIALS

All Coswick products are made of natural timber. Additional materials used during manufacturing are chosen in compliance with rigorous environmental requirements. Finished products are regularly tested for formaldehyde. As for this parameter, Coswick floorboards comply with the highest safety classes in use in the EU (E1) and the USA (NAUF, ULEF). This means that the emission levels of volatile compounds do not exceed that of the emissions of the natural timber.

RESPONSIBLE FOREST USE

We only use FSC-certified and controlled timber. We acquire it from forests with ecologically and socially responsible management practices. Raw materials for floorboard manufacture are felled during forest sanitation activities thus not leading to deforestation. Ask for FSC-certified products.

WASTELESS PRODUCTION

Sawdust and trims from the manufacturing process are used as fuel for our furnace and in the production of fuel briquettes. This way our valuable raw materials are used rationally while simultaneously heating our premises without polluting atmospheric emissions.

SPORTS FLOORING

COSWICK TOURNAMENT SERIES

PERFECT SUPPORT FOR HIGH PERFORMANCE

Coswick sports floors for professional playgrounds Tournament Pro Sport, Tournament Sport, Matrix Sport comply with the highest A4 class of the EN 14904 standard, recommended for international arenas.

Coswick Tournament Series are Area Elastic Floors made of hardwood on a shock-absorbing base specially designed for each structure type. Uniform resilient flooring is the most suitable type of flooring for indoor playing sports where an equally resilient surface is important at every point for athletes to feel confident and in control of the ball throughout the court.

All critical characteristics, shock absorption, resilience, vertical ball bounce, friction and others are developed from a deep understanding of the athletes' needs and objectives. They create the ideal sports environment for professionals and amateurs, adults and juniors.

The floors of the tournament series are covered with an elastic UV-curing sports finish. In terms of slip resistance, gloss level and coefficient of specular reflection, it meets the requirements of the sports standards DIN 18032-2 and EN14904, and in terms of abrasion resistance it significantly exceeds them. All characteristics are regularly confirmed with Taber Abraser tests.

Coswick professional playground sports flooring supports athletes in every move, ensuring their safety and performance, helping them to achieve the best results.

Vertical deformation

Shock absorption

Ball bounce

Rolling load resistance

Surface deformation control

Sliding friction coefficient

Solid Haro

This is what an international standard for sports floor should be like, it's great for training and competitions. Good for running, jumping, nice to touch. Great!

*Anastasia Veremeyenko,
leading Belarusian basketball player*

TECHNOLOGIES

3-LAYER T&G ENGINEERED FLOORING

- Finely balanced and symmetrical 3-layer construction retains its size in a wider range of environmental humidity. All three layers are made of hardwood timber: top lamella from oak, ash or American walnut, middle core from birch and base lamella from oak or birch.

Using birch as a core instead of softer pine species increases the stability of the board as birch is far more resistant to deforming.

Top and base lamellas have the same thickness of 3mm, which allows them to affect the core symmetrically in case of changes in the environment. This increases the balance of the construction and practically eliminates the possibility of twisting. Usage of cork compensators in the core layer decreases straining in case of variations in the environmental humidity, providing additional stability.

- Durable and secure traditional tongue & groove lock. Precise geometry and use of birch in the middle core layer ensures absence of chips and creases on the touching surfaces as well as eliminates creaking.

- Sawn lamella is used for the top layer, which excludes any possibilities of internal cracking. Sawn lamella's texture is identical to the texture of a solid board.
- Extra-durable bonding of lamellas using special polyurethane hot-melt adhesive. It is extremely strong, moisture-resistant and highly elastic. There is no delaminating of the board at the seams even in case of flooding and no "ageing" effect: bonding qualities are retained over the entire life of the floorboards.
- Environmental safety: no formaldehyde emissions.
- Reliability and longevity of the construction is reaffirmed by a lifelong structural integrity guarantee.

INSTALLATION

- 3-layer T&G engineered floorboard can be installed below, on or above ground level.
- Can be installed on heated floors.
- Installed through rigid positioning over concrete using adhesive or on wooden (plywood) base using nails.

FINISHING SYSTEMS

COSWICK SILK FINISH

TECHNOLOGY

Coswick Silk Finish is an innovative deep penetrating UV-cured finish based on modified plant-oil acrylates applied in 4 layers. Silk Finish easily penetrates surface pores of the wood and cures under UV-lights forming a durable film. The pores look half-open and accentuate the natural texture of the wood. The wood continues to breath retaining a healthy micro-climate in the room.

FEATURES

Coswick Silk Finish is highly elastic and moisture- and temperature fluctuation resistant, it protects the floorboards from dirt and scuffing. The "half-open" effect on the pores and the brushing technology conveys the relief, depth and natural texture of the boards. Silk Finish surface is just as warm and pleasant to the touch as natural, untreated wood. Faint satin sheen and texture conceals marks, dents and scratches, facilitating maintenance.

ECOLOGY

Environmentally friendly finish made from modified plant oils does not contain solvents or harmful compounds.

CARE & MAINTENANCE

The finish does not require complex maintenance, restores easily and renews during use which prolongs its service life almost indefinitely.

Regular maintenance includes dry and wet cleaning using Coswick care products for oiled floorboards. Parts affected by most stress can be easily restored with Coswick renovation oil for floors. The product is applied directly over the old layer without sanding. Afterwards the finish restores its original look and durability.

Depending on the wear, partial restoration of hardwood flooring in living spaces should be made 1-2 a year, full renewal is recommended every 3-5 years.

COSWICK LACQUER FINISH

TECHNOLOGY

Lacquer finish is 12 coats of UV-cured lacquer with corundum micro-particles. This innovative technology creates a perfectly smooth surface with closed pores and provides for an extremely high wear-resistant finish.

FEATURES

The key defining feature of Lacquer finish is its extreme durability. It is achieved through the use of special primers containing corundum micro-particles. These primers provide the finish with unique wear-resistance, which surpasses that of the traditional polyurethane varnishes tenfold.

The upper coat of the lacquer is based on the cross-linked polymers, a new material created using nanotechnologies. It gives the finish a special wear-resistance to chafing while retaining high elasticity.

ECOLOGY

Eco-friendly finish without solvents or volatile compounds.

CARE & MAINTENANCE

Apart from regular care, lacquer finish does not entail any maintenance or restoration for many years.

COATINGS AND ADHESIVES

COSWICK – OVER 25 YEARS OF DEDICATION TO HARDWOOD FLOORING

Since 1995 Coswick has been creating premium quality hardwood floors of superb and long-lasting performance. The company gained wide manufacturing experience by operating a fully integrated production cycle from logs to readymade prefinished hardwood flooring and became recognized all over the world. We are glad to share our experience with experts and hardwood floors owners as a system of tested products for every stage of hardwood flooring use.

Coswick well-balanced formula and unique quality control system ensure highest quality of primers, adhesives, lacquers, cleaners, renovation and care products suitable for all types of hardwood floors and protective- decorative finishes.

Coswick is dedicated to production of well balanced, high performance, eco-friendly and easy to use products. We are working to make your hardwood flooring everlasting and bringing you joy and happiness.

FLOOR CARE PRODUCTS

COSWICK SERVICE KIT

Is designed to clean solid and engineered wood floors that have a lacquer or oil finish.

The kit includes a microfiber mop cloth and ready-to-use Coswick Hardwood Cleaner.

Microfiber mop cloth:

- Very effective against dust;
- Highly absorbent and long service life;
- Suitable for machine wash.

Ready-to-use Hardwood Cleaner:

- Perfectly removes fat stains and dirt;
- Supplied for lacquered and oiled Coswick hardwood flooring ;
- Non-abrasive, does not leave stains;
- Has a delicate aroma.

CLEANER FOR HARDWOOD FLOORS

Cleaner is designed for constant maintenance of hardwood flooring. Neutral pH ensures the minimal risk of color changes. Non-abrasive, does not leave stains. Has a delicate aroma. Contains 0.5 litres per bottle.

CLEANER CONCENTRATE FOR HARDWOOD FLOORS

Cleaner Concentrate is designed for preparing a Coswick Cleaner for constant maintenance of hardwood flooring. Dilute the cleaner concentrate in 1:50 ratio (i.e. 200 ml of concentrate per 10 l of water).

COSWICK RENEWER OIL FOR OILED AND HARDWAX-OILED HARDWOOD FLOORS

Renewer oil is developed for renovation of hardwood flooring with UV-oil, natural oils or modified alkyd oil finishes. High wear resistance, creates elastic protective film. Recommended for constant renewal and resurfacing of hardwood flooring. Does not require prior sanding.

COSWICK PROTECTIVE WAX FOR OILED AND HARDWAX-OILED HARDWOOD FLOORS

Product is developed for renovation of hardwood floors with natural oil, Hardwax or UV-oil finishes. Product creates an elastic, protective and water-repellent surface film.

TINTED OIL FOR RESTORATION OF OILED AND HARDWAX-OILED HARDWOOD FLOORS

Product is developed for renovation of hardwood floors with natural oil and Hardwax finishes. Product creates an elastic protective film on floor surface after applying.

COSWICK WOOD STAIN

Coswick stain is designed to tone wooden surfaces. Recommended to renovate small scratches, damages and end grains during the hardwood flooring lifetime exploitation. Suitable for stairs, moldings, wall panels and other.

COSWICK HEAVY DUTY CLEANER FOR HARDWOOD FLOORS

Product is designed to clean hardwood flooring with any type of finish. Recommended for removal of glue or spot residues after hardwood flooring installation. Use Heavy Duty Cleaner periodically during the hardwood flooring lifetime exploitation if any stain spots and contaminations which are hard-to-reach with cleaner for constant maintenance.

REPAIR KIT PROFI

Profi repair kit is a full set of tools designed to remove a minor flaws, scratches and dents that appear during the hardwood flooring lifetime exploitation.

COSWICK WAX FILLER

Ready-to-use wax for quick remove of small damages, scratches and dents, that appear during the hardwood flooring lifetime exploitation.

Wax filler is available in all Coswick colors.
